# Building Materials

## Price Statistics

November 2017

Release Date: December 2017

## Briefing

The monthly publication of Building Materials Price Statistics is of great significance as building material prices are deemed to be important economic indicators for planning and research in various fields. They are also used in the compilation of indices of the construction activity and for the calculation of GDP at constant prices.

Statistical centres all over the world collect prices of building materials used by a large segment of people. As a result of the urban development and the constant growth in the construction sector in the Emirate, Statistics Centre – Abu Dhabi collects price data for these materials on a regular basis. The movements of prices of 21 groups from the key building materials are included in this publication. This information helps decision and policy makers and researchers in planning and making sound decisions in support of the building materials sector and other sectors associated with it.

## Key Points

- During November 2017 the average prices of the “Roofing materials” group increased by 22.4%, “(PVC) Pipes” by 9.2% and the “Waterproofing products” group by 7.0%, compared with October 2017.
- During November 2017 the average prices of “(UPVC) Pipes” decreased by 7.9% “Steel” by 3.0% and “Cement” by 0.7% compared with October 2017.
- During November 2017 the average prices of “Power Cable” increased by 12.8%, “Wood” by 11.9% and “Steel” by 11.7%, compared with November 2016.
- During November 2017 the average prices of “Natural stone” decreased by 16.7%, “Glass” decreased by 9.9% and “Employment / with all services” decreased by 9.4%, compared with the same period in the previous year.

## Notes

### Technical notes

The current methodology for Building Materials Price Statistics including conceptual basis, construction of the basket, data collection, validation, processing procedures, averaging and treatment of missing values, and potential sources of error are described in the methodology of Building Materials Price Statistics, which is available on SCAD's website at <http://www.scad.ae>.

### Data sources

Data are obtained from the monthly survey of Building Materials Prices; the data are collected, processed and passed to Statistic Centre – Abu Dhabi for further editing and compilation.
