Consumer Price Index

November 2016

(Base year 2014)

Detailed by:

- Expenditure groups
- Household welfare levels
- Household type
- Regions

Briefing

This publication provides an analysis of the results of the CPI for November and the first eleven months of 2016 with the base year 2014. In addition, the publication provides the results of the CPI by household welfare levels, by household type and by region and percentage change in the main expenditure group. The main findings of this analysis are outlined below:

Key Points

- The inflation rate in consumer prices for the first eleven months of 2016 was 2.1%, compared with the same period of 2015.
- The Abu Dhabi region contributed 75.3% of the total increase of 2.1% for the first eleven months of 2016 compared with the same period of 2015, while the Al-Ain region contributed 21.5% and the Al Gharbia region 3.2%.
- The CPI increased by 2.4% in November 2016, compared with November 2015.
- The CPI increased by 0.5% in November 2016 compared with October 2016.
- The rise in consumer prices for the first eleven months of 2016 compared with the same period in 2015, contributed to an increase of 2.3% in consumer prices for households of the bottom welfare level over the same period of comparison. Consumer prices rose by 2.3% and 2.0% for households of the middle and the top welfare levels respectively.
- Consumer prices for the first eleven months of 2016 compared with the same period in 2015, increased by 1.8% for citizen households, followed by 2.4% for non-citizen households and 2.7% for share households.
- Table (1) shows the 'Housing, water, electricity, gas and other fuels' group accounted for the largest rise in the index during the first eleven months of 2016 compared with the same period of 2015, which contributed 91.3% to the overall increase in the CPI. Prices of this group increased by 5.9% over the same period.
- The 'Miscellaneous goods and services' group contributed 7.8% to the overall increase in the CPI for first eleven months of 2016 compared with the same period of 2015. Prices of this group increased by 2.4% over the same period.

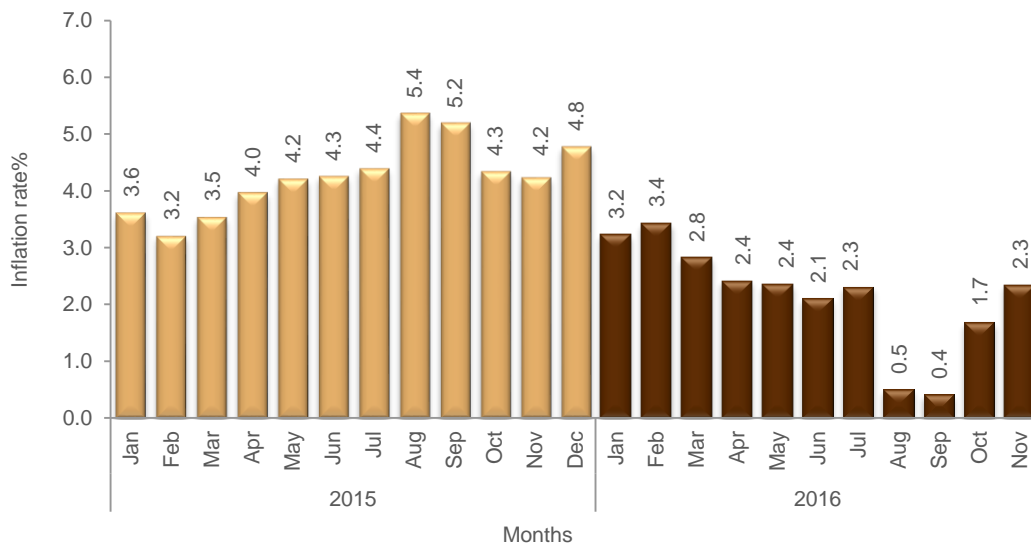

- While the prices of the 'Food and beverages' group decreased by 0.1% during the first eleven months of 2016 compared with the same period of 2015, which contributed 0.8% of the overall increase in the CPI,

Table (1): Major expenditure groups by weights, relative change and contribution for the first eleven months of 2016 compared with the same period of 2015

Main expenditure groups	Weight	Relative change%	Contribution%
Food and beverages	12.3	-0.1	-0.8
