## Executive summary

This report provides an analysis of the CPI for the month of May 2011 with the base year 2007. In addition, the report provides the results of calculating the CPI by household welfare levels and by household type. The main findings of this analysis are outlined below:

- The average rise in consumer prices for the first five months of 2011 was 2.5%, compared with the same period of 2010, from 117.8 points to 120.8 points over this period.
- The CPI increased from 118.2 points in May 2010 to 120.7 points in May 2011 or by 2.1%.
- A month-to-month comparison shows that the CPI edged up 0.3% to 120.7 points in May 2011, up from 120.3 points in April 2011.

**Figure 1: Monthly CPI from January 2009 to May 2011**

Source: Statistics Centre - Abu Dhabi

- An overall rise of 2.5% in consumer prices during the first five months of 2011 compared with the same period in 2010 has led to an increase of 4.4% in consumer prices for households of the bottom welfare quintile over the same period of comparison. As for the other welfare levels, consumer prices grew by 1.8% for households of the top quintile and by 2.5% for the upper middle welfare quintile.

- The year-on-year rise of 2.5% in consumer prices for the first five months of 2011 contributed to a rise in consumer prices for national households by 2.5%, and by 2.2% for non-national households and 4% for collective households.

### Consumer price index for the month of May 2011 (2007=100)

Table1 displays CPI values for the months of April and May of the years 2010 and 2011, along with the average CPI for the first five months of the same years, and the percentage changes between the periods specified.

**Table 1: Average CPI and relative change**

Year	Apr	May	Jan – May
	CPI

#### 1. Average CPI for the first five months of 2011 compared with the same period of 2010

During the first five months of 2011, average consumer prices rose by 2.5% compared with the same period of 2010, with the CPI for the first five months of 2011 at 120.8 points, compared with 117.8 points for the same period of 2010. This rise in prices reflects the net change in the consumer basket prices (resulting from upward and downward movement) during the two periods compared.

Rises in the CPI do not necessarily correspond to an increase in all goods and services prices included in the CPI basket, nor do they mean that all goods and services have increased by the same percentage (2.5% in this case); for there are goods and services for which prices have risen at rates above the overall rate and others with rates of increase below the general average. There are also goods and services for which prices have fallen. However, the net change or the combined outcome of these changes (upward and downward movements) in the prices of the consumer basket during the first five months of 2011 compared with the same period in 2010 produced an overall increase in prices of 2.5%.

Table 2 contains the twelve major expenditure groups, as per the international classification, i.e. "Classification of Individual Consumption according to Purpose (COICOP)", and the weight or relative importance of each one of the main expenditure groups. The weight of any group is the households' expenditure on that group as a proportion of total expenditure on all groups. The table also shows the relative change, which is the percentage rate of change in the prices of any given group for the first five months of 2011 compared with the same period of 2010. The

percentage contribution reflects the expenditure group's contribution to the overall change in the prices of all groups, which is 2.5%.

**Table 2: Weights, relative change and contribution of expenditure groups to the overall change in CPI, Jan-May 2011 compared with Jan-May 2010.**

Main Expenditure Groups	Weight	Relative change	Contribution
		— % —	
Food and non-alcoholic beverages	16.1	8.1	52.7
Alcoholic beverages and tobacco	0.3	0.0	0.0
Clothing and footwear	9.8	-16.1	-61.9
Housing, water, electricity, gas and other fuels	37.9	2.3	36.2
Furnishings, household equipment and routine household maintenance	4.8	6.6	12.2
Health	0.8	0.0	0.0
Transport	9.7	9.9	35.5
Communication	7.7	4.4	11.0
Recreation and culture	2.4	1.9	1.6
Education	2.6	4.3	5.5
Restaurants and hotels	3.4	1.6	2.3
Miscellaneous goods and services	4.6	2.8	5.0

Source: Statistics Centre - Abu Dhabi

The above table shows that the "Food and non-alcoholic beverages group", accounted for 52.7% of the rise in the index, due to increases in the prices of most of the subgroups included in this group. Prices of the "Meat" subgroup rose by 13.6%, "Coffee, tea and cocoa" by 12.2%, "Vegetables" rose by 8%, "Mineral waters, soft drinks, fruit and vegetable juices" by 9.3%, "Fruits" by 11.1%, while, "Fish and seafood" by 7.8%, "Foods not elsewhere classified" by 7.7%, "Bread cereals" by 5.3%, "sugar, jam, honey, chocolate and confectionery", rose by 3.4%, and prices of the "Milk, cheese and eggs" subgroup rose by 1.4%.

The next highest contributor to the overall year-on-year increase in the CPI over the first five months of 2011 was the "housing, water, electricity, gas and other fuels" group which accounted for 36.2% of the increase in the CPI during the first five months of 2011.

The "Transport" group which contributed 35.5% to the year-on-year rise in consumer prices for the periods compared increased by 9.9%. Prices for the "Operation of personal transport equipment" subgroup grew by 12.4% due to a rise in "Fuel and oils and greases for personal transport equipment" by 20.9%.

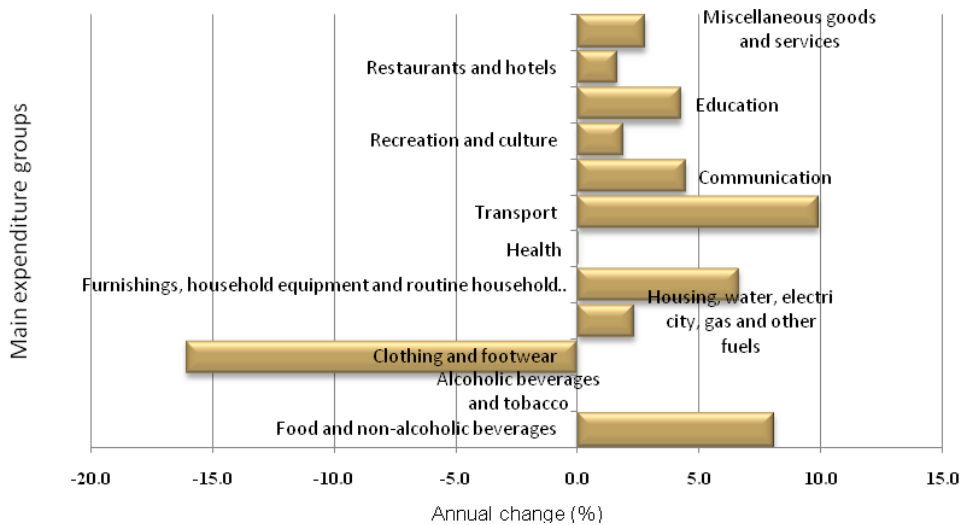

The prices of “Furnishings, household equipment and routine household maintenance” rose by 6.6% during the first five months of 2011 compared with the same period of 2010. This group contributed 12.2.% of the total increase achieved by all groups. The most important subgroups, “Goods and services used in the normal household maintenance” and “Household textiles” rose by 7.7% and 5.3% respectively.

The “Communications” groups contributed 11% of the CPI increase during the first five months of 2011 compared with the same period in 2010. The most important subgroup that caused this increase was “Telephone and telefax services” which rose by 4.7%.

The “Education” group accounted for 5.5% of the overall CPI increase occurring during the first five months of 2011 compared with the same period of 2010. The “Miscellaneous goods and services” group contributed 5% to the overall increase achieved in the mentioned period. The “Restaurants and hotels” and “Recreation and culture” groups contributed 2.3% and 1.6% respectively.

Among the main groups that slowed down the rise in consumer prices during the first five months of 2011 compared with the same period of 2010 was the "Clothing and footwear" group which contributed by -61.9%. The prices of this group decreased by 16.1% as a result of a drop in the prices of the “Clothing” and “Footwear” subgroups by 16% and 17.7%, respectively during the period specified.

## 2. Comparing the CPI of May 2011 with the CPI of May 2010

Average consumer prices increased by 2.1% in May 2011 compared with May 2010, with the CPI at 120.7 points in May 2011 and 118.2 points in May 2010. This increase

in prices was due to the net movement (increases and decreases) of consumer prices during the past year.

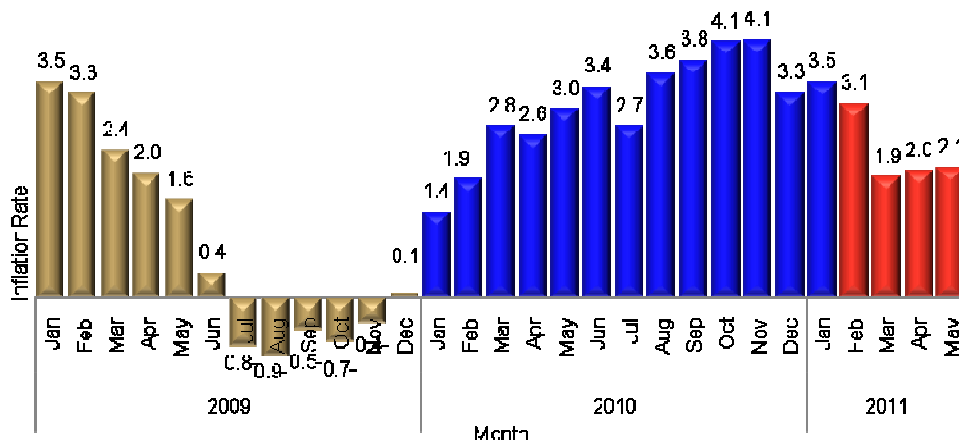

The most significant individual increase came from higher prices for the “Communication” group (up 12.4%), prices of “Food and non-alcoholic beverages” (up 7.7%), “Transport” group (up 6.7%), and followed by “Furnishing, household equipment and routine household maintenance” (up 4.4%), In addition, prices of “Education” increased by 4.3%, “Miscellaneous goods and services” increased by 2.6%, prices of “Housing, water, electricity, gas and other fuels” increased by 1.9%, “Recreation and culture” increased by 1.5%, and “Restaurants and hotels” increased by 0.5%. At the same time, prices of the “Clothing and footwear” group decreased by 18.5%.

**Table 3: Weights and relative changes in the average CPI of the main groups, May 2011 compared with May 2010.**

Main Expenditure Groups	Weight	Relative change
Food and non-alcoholic beverages	16.1	7.7
Alcoholic beverages and tobacco	0.3	0.0
Clothing and footwear	9.8	-18.5
Housing, water, electricity, gas and other fuels	37.9	1.9
Furnishings, household equipment and routine household maintenance	4.8	4.4
Health	0.8	0.0
Transport	9.7	6.7
Communication	7.7	12.4
Recreation and culture	2.4	1.5
Education	2.6	4.3
Restaurants and hotels	3.4	0.5
Miscellaneous goods and services	4.6	2.6

### 3. Comparing the CPI of May 2011 with the CPI of April 2011

Average consumer prices increased by 0.3% in May 2011 compared with April 2011, as the CPI rose from 120.3 points in April 2011 to 120.7 points in May 2011. This overall increase in the prices between the two months reflects the net movement (increases and decreases) of consumer prices during the periods compared.

The “Food and non-alcoholic beverages” group (up 2.2%) recorded the largest price increase in May 2011 compared with April 2011. This increase was a result of the rises and falls that have occurred in the sub-groups’ prices. The prices of “Vegetables” increased by 15.9% and the “Fish and seafood” sub-group decreased by 12.1%.

**Figure 4: Monthly Consumer Price Index (2007=100), 2008 to 2011**

Source: Statistics Centre - Abu Dhabi

### 4. Consumer price index by household welfare level for May 2011

The rise in consumer prices during the first five months of 2011 by 2.5% above the price levels of the same period in 2010 resulted in a surge of 4.4% in consumer prices for households of the bottom welfare quintile for the same period of comparison. The corresponding rise for other welfare levels was 1.8% for households of the top quintile and 2.5% for the upper middle quintile. While the prices of the “lower middle” welfare quintile increased by 3.6%.

**Table 4: Average CPI and relative change by household welfare level, first five months of 2010 and 2011**

Period	Lower Class	Lower-Middle Class	Middle Class	Upper-Middle Class	Upper Class	All households
— CPI —						
2010 (Jan – May)	115.6	117.3	117.9	118.4	117.9	117.8
2011 (Jan – May)	120.7	121.5	121.6	121.3	120.0	120.8
— % —						
Relative Change	4.4	3.6	3.2	2.5	1.8	2.5

Relative change is based on the unrounded CPI  
Source: Statistics Centre - Abu Dhabi

The rise in consumer prices in May 2011 by 2.1% compared with May 2010 caused a rise in consumer prices for households in the “Lower class” welfare level of 4.8% while prices increased for households in the “Upper class” welfare level by 1.2%. The prices for households in the “Middle Class” increased by 2.7%.

**Table 5: Average CPI and relative change by household welfare level**

Period	Lower Class	Lower-Middle Class	Middle Class	Upper-Middle Class	Upper Class	All households
— CPI —						
May -10	115.5	117.7	118.3	118.9	118.4	118.2
May -11	121.0	121.6	121.5	121.1	119.8	120.7
— % —						
Relative Change	4.8	3.3	2.7	1.9	1.2	2.1

Relative change is based on the unrounded CPI  
Source: Statistics Centre - Abu Dhabi

The rise in consumer prices in May 2011 by 0.3% compared with April 2011 caused a rise in consumer prices for households in the “lower class” welfare level of 0.8% while prices for households in the “Lower Middle Class” “Middle Class” and “Upper Middle Class” increased by 0.5%, 0.4% and 0.3% respectively. The prices increased for households in the “Upper class” welfare level by 0.2%.

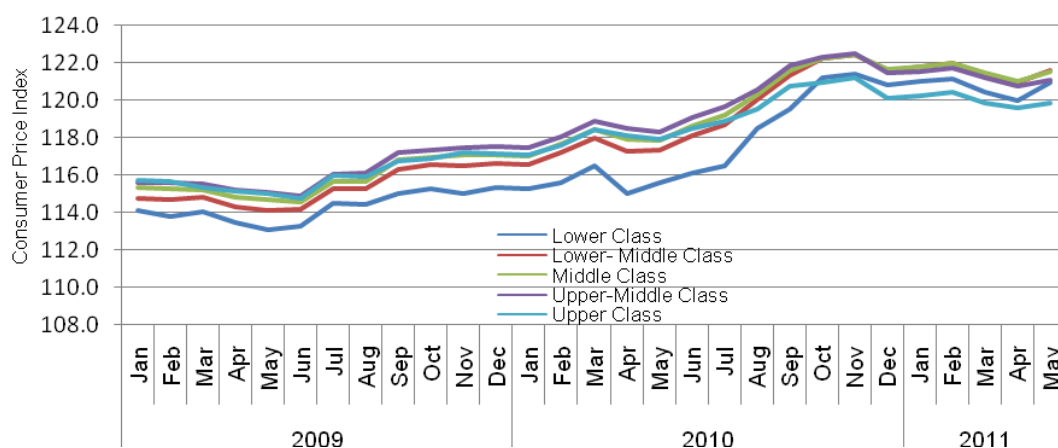

**Table 6: Average CPI and relative change by household welfare level**

Period	Lower Class	Lower-Middle Class	Middle Class	Upper-Middle Class	Upper Class	All households
— CPI —

## 5. Consumer price index by household type for May 2011

The 2.5% year-on-year rise in consumer prices for the first five months of 2011 pushed up consumer prices for national households by 2.5%, compared with 2.2% for non-national households and 4% for collective households.

**Table 7: Average CPI and relative change by household type, first five months of 2010 and 2011**

Period	National	Non-National	Collective	All households
	— CPI —			
2010 (Jan – May)	117.2	119.0	115.6	117.8
2011 (Jan – May)	120.2	121.6	120.2	120.8
	— % —			
Relative Change	2.5	2.2	4.0	2.5

Relative change is based on the unrounded CPI

Source: Statistics Centre - Abu Dhabi

The rise in consumer prices in May 2011 by 2.1% compared with May 2010 caused a rise in consumer prices for national households by 2.0% during the same period. Prices for non-national households increased by 1.7% while prices for collective households increased by 4.4%.

**Table 8: Average CPI and relative change by household type, May 2011 compared with May 2010**

Period	National	Non-National	Collective	All households
— CPI —				
May 2010	117.6	119.6	115.3	118.2
May 2011	120.0	121.5	120.4	120.7
— % —				
Relative Change	2.0	1.7	4.4	2.1

Relative change is based on the unrounded CPI  
Source: Statistics Centre - Abu Dhabi

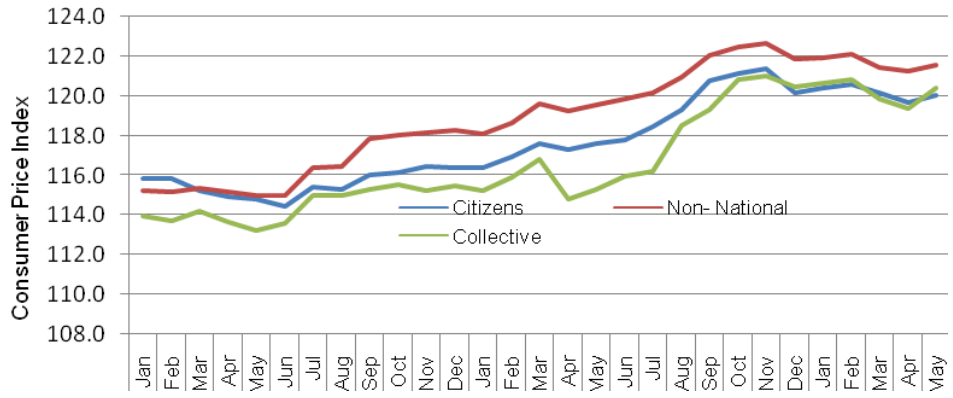

The rise in consumer prices (up 0.3%) in May 2011 compared with April 2011 caused a rise in consumer prices for national households and non-national households (up 0.3%), while prices of the collective households increased by 0.9%.

**Table 9: Average CPI and relative change by household type, May 2011 compared with April 2011**

## **Appendices**

Appendix (I) provides the CPI estimates for May 2011 and May 2010, and the CPI for April 2011. In addition, includes the relative changes in the CPI estimates between the mentioned periods at the main expenditure group level and some selected sub-group level.

Appendix (II) provides the estimates of the CPI average for the period (January- May) for 2010 and 2011. In addition, appendix (II) includes the relative changes in the CPI estimates between the mentioned periods at the main expenditure group level and some selected sub-group level.

Appendices (III- XVIII) include the consumer price index during the months of May 2011, May 2010, April 2011, and during the periods (January-May) of the years 2010 and 2011 detailed by households' welfare levels and by household type at the main expenditure group level and some selected sub-group level. In addition, appendices (III - XVIII) include the relative changes in the CPI estimates between the mentioned periods.
