Briefing

This publication provides an analysis of the results of the CPI for May 2020 with the base year 2014. In addition, it provides the results of CPI by household welfare levels, by household type and provides the percentage contribution of the major expenditure groups in the annual price change.

Key Points

- The rate of decline in consumer prices was 2.1% during the period January-May of 2020 compared to the same period of 2019, the index reached 108.8% for the period January-May of 2020, while it was 111.2% for the same period of 2019.
- The CPI decreased by 2.8% in May 2020 compared with May 2019, where the index reached 108.7% during May 2020, while it was 111.9% in May 2019.
- The CPI increased by 0.1% in May 2020 compared with April 2020, where the index reached 108.7% during May 2020, while it was 108.6% in April 2020.
- The decline in consumer prices during January-May 2020 compared with the same period in 2019, contributed to a decrease of 1.3% in consumer prices for households of the bottom welfare level, and 1.9% for the middle welfare level, and 2.5% for the top welfare level.
- The decline in consumer prices during January-May 2020 compared with the same period in 2019, contributed to a decrease of 2.1% for citizen households, 2.3% for non-citizen households, and 1.7% for shared households.
- The 'Housing, water, electricity, gas and fuel' group contributed 64.2% to the overall decrease in the CPI during Jan-May 2020 compared with the same period in 2019. Prices of this group decreased by 4.4% over the same period.
- Prices of the 'Transport' group decreased by 3.0% during Jan-May 2020 compared with the same period in 2019, and contributed 19.6% to the overall decrease.
- The 'Furnishings, household equipment' group contributed by 16.3% to the overall decrease in the CPI during Jan-May 2020 compared with the same period in 2019. Prices of this group decreased by 4.8% over the same period.

- Prices of the 'Food and beverages' group increased by 3.4% during Jan-May 2020 compared with the same period in 2019, and contributed 18.5% in reducing the overall decrease in the CPI.

Notes

Technical notes

For better understanding of the statistical indicators mentioned in this summary, please refer to the accompanied technical notes on the SCAD website.

Data sources

Data are obtained through a field survey by collecting the prices from different outlets in Abu Dhabi Regions (Abu Dhabi, Al Ain and Al Dhafra) The data are processed and passed to the Prices and Income Section at Statistic Centre – Abu Dhabi for further editing and compilation.

More information and detailed release

For more information about the Consumer Price Index (**CPI**) and other official statistics, please visit the statistics link on the SCAD website at www.scad.gov.ae

Revision Statement

The CPI is compiled on a monthly basis, within 12 working days from the end of the reference month. The results of CPI calculations are considered final. Therefore, the CPI figures are not subjected to future revisions because of new data becoming available. When an error is discovered, there are transparent procedures taken with a request sent to the Project Management Office to correct the error. These procedures are in line with the policy of the Statistics Center - Abu Dhabi. The base year of the Consumer Price Index is updated as recent data from the Household Income and Expenditure Survey (HIES) become available, usually updated every five years.
