Producer Price Index (PPI)

Manufacturing (2012=100)

Second Quarter
2017

Preliminary

Release Date: September 2017

Briefing

In the light of the rapid economic and social development in the Emirate of Abu Dhabi, price indices and indicators are considered key tools that express changes in the prices of industrial and commercial production and services. Indices are also considered important economic indicators that provide accurate data to decision makers, economists, researchers, policy makers and other users of official statistics.

The remarkable economic development witnessed by Abu Dhabi Emirate has called for the construction of a statistical index that reflects the growth of the economic production sectors. Therefore, Statistics Centre – Abu Dhabi constructed the industrial producer price index for the Emirate of Abu Dhabi.

The Producer Price Index (PPI), which is calculated on a quarterly basis, cover the manufacturing sector. The PPI design is based on the main list of products of the industrial manufacturing activities in the International Standard Industrial Classification-revision 4 (ISIC4) which covers all manufacturing economic activities.

The calculated figures represent a time series that measures the changes in the production prices during a specific period compared with the base year 2012. SCAD follows the best international practices and methodologies for the calculation of the PPI and the processing of data. Further development of the PPI will cover more activities such as mining and quarrying, and water and electricity.

Key Points

1. The PPI in the second quarter of 2017 increased by 3.3% compared with the same quarter in 2016, raising to 71.2% in the second quarter of 2017 from 68.9% in the second quarter of 2016.
2. In the second quarter of 2017, the PPI increased by 4.2% compared with the first quarter of 2017, raising to 71.2% compared with 68.3% in the first quarter of 2017.
3. The key activity that recorded an increase in its price, during the second quarter of 2017 compared with the corresponding quarter in 2016 was the 'Manufacture of coke and refined petroleum products' for which prices increased by 53.7%, contributing 291% to the overall change. The price of LPG fell by 74.1% from the same quarter in 2016, while the prices of (Unleaded Gasoline 95 and Unleaded Gasoline 98) increase by 44.5% and 39.1% respectively.

In addition, when we compared to the second quarter of 2017 with the first quarter of 2017, the activity of "Manufacture of coke and refined petroleum products "are contributed to increase the overall change by 57.2% where the prices rose by 9.4% during the same period of compared.
