Hotel

Price Index

December 2017

Briefing

The Emirate of Abu Dhabi is one of the most attractive tourist destinations in the Middle East because of the developed infrastructure and quality of services in the tourism sector. Hotel establishments represent the fundamental base of the tourism sector. In general, hotel establishments pricing strategies are considered as one of the most important factors contributing to the growth of the tourism sector.

To meet the requirements of customers, the Statistics Centre - Abu Dhabi (SCAD) has decided to construct a statistical price indicator to measure the changes in the hotel establishment's room rates in Abu Dhabi. This indicator provides information about price movements in the hotel establishments based on the categories of hotels adopted by the Abu Dhabi Tourism and Culture Authority. Hotels are categorized from one to five stars, while hotel apartments are categorized as 'Deluxe', 'Standard' or 'Superior'. The index is calculated using the Laspeyres formula.

The hotel establishment's room rates are collected and the index is calculated monthly according to the adopted categories of hotels in Abu Dhabi. This informs decision-makers and policy-makers, tourists and tourist offices and other users of the data about the change in hotel room rates, which contribute to increased transparency and development of the tourism sector in the Emirate of Abu Dhabi.
